

I hereby urge and request the FCC to reject the National Association of Broadcasters petition 04-160, and any other such petition put forth in an attempt to restrict satellite radio broadcasting. Although my community is not yet served by XM Radio's Instant Traffic and Weather reports, I look forward to the day when these reports will be available in my area. I anticipate making use of the reports where they are available when I travel. As a paying subscriber to XM radio, I feel it is unreasonable for the NAB to attempt to control the substance and content of satellite radio, and that this attempt is a clear case of the NAB trying to limit competition and innovation by imposing self-interested legislation. Instead of trying to restrict what I am willing to pay for they should spend their money and effort to improve the product they offer.

XM offers a vastly superior product in terms of quality and usefulness without the annoying and often tasteless irritations that are so much a part of traditional radio broadcasting.

Sincerely,

Rob Robertson
